Floyd Malveaux Symposium

The Annual Floyd Malveaux Symposium is named in honor of our Section founder, the late allergist, Dr. Malveaux. This is our initiative where we discuss medical issues from a policy and public health perspective. This seminar will address ways to effectively address vaccine resistance, discuss potential policy interventions, and investigate the public health implications that decreased immunization rates have on our communities of color and other vulnerable populations.

Addressing Vaccination Barriers in Children and Adults; A public health and policy approach
